

Zn

## HIGH PERFORMANCE. HIGH TECHNOLOGY. HIGH QUALITY.

**HI-Q range** is a complete range of innovative solutions combining our Plant Stimulating Peptides and a high content of micronutrients, for a strong nutritional and biostimulant action.

The presence of PSP, coming from the Vegetal Protein Hydrolysates (VPH), improves the ability of plants to absorb nutrients in order to better prevent or cure nutritional deficiencies and disorders.

All HI-Q solutions are to be applied foliar, so that the action is even quicker and effective.

**HI-Q Zn** prevents and effectively treats physiological disorders caused by zinc deficiency: poor color of the fruit, production losses, fruit drop, reduced rooting, dwarfism, bleached in maize shoots etc..It is ready to use and thanks to its high solubility and assimilation ability, it helps plants to quickly overcome the stress induced by nutritional imbalance, also balancing the vegetative growth.

### COMPOSITION

|                                    |               |
|------------------------------------|---------------|
| Zinc (Zn) water soluble            | 10% (135 g/L) |
| VPH (vegetal protein hydrolysates) | 10% (135 g/L) |
| pH (1:5)                           | 5             |
| Specific weight                    | 1,35 kg/L     |

### ADVANTAGES

- Strong nutritional and biostimulant action
- It increases the nutritional balance in order to obtain a better quality of the yield
- Prevention and treatment of Zn deficiencies.
- It improves nutrient use efficiency
- It balances vegetative growth

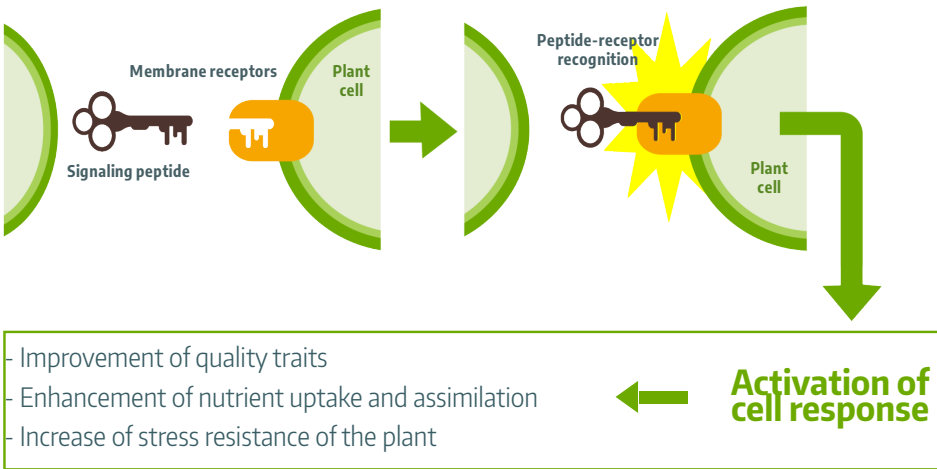

## PLANT STIMULATING PEPTIDES INSIDE

HELLO NATURE pioneer in new biotechnologies, has developed a unique production process based on Vegetal Protein Hydrolysates (VPH) and resulting in Plant Stimulating Peptides (PSP).

- 100 % vegetal origin
- Prominent, assured and natural biostimulant effect
- No-GMO, and safe product for crops and humans (low salinity, no antibiotics nor heavy metals)

- Improvement of quality traits
- Enhancement of nutrient uptake and assimilation
- Increase of stress resistance of the plant

**Activation of cell response**

## USE AND DOSE

All dosages provided are in standard conditions, dosages and modes of application are to be determined on the basis of the requirements and the nutritional status of the crop.

We recommend the application in the coolest hours of the day (morning or evening) to obtain maximum absorption by the leaves and the best effectiveness.

HI-Q RANGE range can be mixed with the most common phytosanitary products and fertilizers on the market. Before using we recommend testing on a small surface for compatibility with other products.

Liquid fertilizer for foliar application (on leaves).

| Crops  | Application rate | Application stage  | Number of applications |
|--|------------------|--------------------|------------------------|
| Vegetables, ornamental, medicinal and aromatic crops               | 2 - 3 L/Ha       | During crop cycle  | 1 to 2 applications    |
| Woody Perennials (grape, berries, fruit trees...)                  | 2 - 3 L/Ha       | From fruit setting | 1 to 2 applications    |
| Broadacre (cereals, beets, potatoes, oilseed and protein crops...) | 2 L/Ha           | Early stages       | 1 to 2 applications    |

## PACKAGING

1 - 5 - 20 L and 1200 kg IBC

Suitable for organic farming according to REG (EU) 2018/848
